Plans for registry/ nephrology resources in the region

- Big challenge
- The links between ISN Regional Board and National/Regional Society of Nephrology is not stable
 - An **effective core member** from each Country/Region is needed to contact the National/regional societies of Nephrology

Agenda

- Membership overview
- Regional Workshop plans

 - 0by25 and Saving Young Lives, DICG, ISN Education, events, health policy initiatives, World Kidney Day....
- Plans for registry/ nephrology resources in the region
- **AOB**

Discussions

- Membership:
 - Young doctors training in nephrology under the age of 37 get a FREE ISN membership. This needs to be better communicated.
 - Affiliated societies can develop collective membership agreements with ISN: A minimum of 75% of the Society members become ISN members at a reduced rate. This can be negotiated with ISN HQ
- Affiliated societies:
 - The Regional Board should encourage societies to become affiliated there are several benefits:
 - Possibility to sign up for Collective Membership. A minimum of 75% of the Society members become ISN members at a reduced rate.
 - Priority consideration for the organization of joint events (World Congresses of Nephrology, Nexus symposia, Forefronts symposia).
 - Priority endorsement of special courses and/or events.
 - Announcement of courses and/or events through ISN media (Gateway, Newsletter, E-updates).
 - Acknowledgement of the affiliated societies' role in supporting the philanthropic and humanitarian mission of ISN in ISN publications and media.

Discussions

- ISN Programs:
 - South to south collaboration should be encouraged: eg: in China.
- Survey on the state of nephrology:
 - One contact person within the societies should be appointed to be the official contact person to respond to a survey gathering data and information on the state of nephrology in the region.
